

GLOBAL FINTECH FEST 2026 · SBI INNOVATION CHALLENGE

Saarthi AI

Agentic Personal Banking Relationship Manager

"Every SBI customer deserves a Relationship Manager. Saarthi AI makes that possible."

Team:

Shreyansh Sawarn · DevOps Engineer, TCS

Rehan Sawarn · Student, Manipal University

Banking Is Digitized – But Engagement Is Still Reactive

SBI has built world-class digital infrastructure. Yet customer engagement remains **passive, generic, and one-size-fits-all**. Relationship Managers serve only premium segments, leaving millions without personalized financial guidance.

→ Generic notifications

Poor engagement, no personalization

→ Reactive support model

Customers must initiate every interaction

→ Low digital adoption

YONO and digital services underutilized

→ High operational costs

Support burden without intelligent automation

Not a Chatbot. An Agentic AI Relationship Manager.

Saarthi AI continuously **observes, reasons, plans, and acts** — with full customer consent at every step. It is a closed-loop Agentic AI system, not a reactive Q&A bot.

 **Human-in-the-loop by design.** No action is taken without explicit customer approval. Saarthi AI is transparent, explainable, and accountable.

Six Specialized AI Agents · One Intelligent Orchestrator

Saarathi AI's multi-agent architecture ensures each banking function is handled by a purpose-built AI specialist. The **Agent Orchestrator** coordinates all agents, resolves conflicts, and maintains a unified customer context.

Finance Health

Spending, savings & wellness score

Product Recommendation

Loans, FDs, insurance & investments

Digital Adoption

YONO onboarding & digital education

Engagement

Goals, rewards & financial coaching

Banking Assistant

Service requests & complaint tracking

Fraud Guardian

Security alerts & fraud detection

From First Tap to Intelligent Action

Every interaction is **transparent, consent-driven, and explainable**. The customer remains in control at every stage.

Transparent AI

Every recommendation is explained in plain language

Customer Consent

No action without explicit customer approval

Human-in-the-Loop

AI advises, customer decides, bank executes

Responsible AI

Built-in compliance, audit trails, and data privacy

Enterprise-Grade Architecture Built for Scale

Core Technology Stack

AI & Orchestration

Google Gemini · LangGraph · MCP · RAG

Backend & APIs

Python FastAPI · REST · SBI Core Banking APIs

Data Layer

PostgreSQL · Redis · Pinecone / ChromaDB

Cloud & DevOps

Azure · Docker · Kubernetes

Security

OAuth2 · JWT · RBAC · End-to-end encryption

Value for Customers. Value for SBI.

Customer Benefits

- **Personalized banking**
Tailored to individual financial behavior
- **Proactive financial guidance**
